Imitation vs real

Staff & thieves will never know cameras aren't real

Imitation Cameras Security Deterrent Kit

D-I-Y Anti-Theft Kit

PNP-30TM

Dummy cameras imitate the appearance of real cameras & many people use them to deter theft & protect their property. Although the untrained eye does not discern the difference between a dummy and an actual working camera, debate on their effectiveness has often been argued.

Swann dummy cameras are based on real Swann security cameras! Even the IR night vision LEDs are replicated in Swann's dummy cameras. Many theft experts promote the usage of dummy domes. These cameras effectively create doubt in people's minds. They can't tell if they are real or fake.

Many customers opt for a dummy camera security system because they are affordable, easy to install, are very low maintenance & effective at deterring theft.

Installation

1

Lightweight design for Do-It-Yourself installation

2

For temporary or permanent deterrence

3

Just peel back double sided tape & mount on walls or ceiling (3 strips of tape per dome)

Real
