

# Auto Iris 3.5-8mm Lens

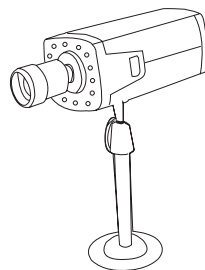

With manual zoom for consistent pictures in variable light

- 3.5-8mm DC 'CS' mount lens with auto iris for variable angle viewing and focus detail
- Easy to use camera accessory
- Suitable for changing light conditions & areas exposed to natural light
- Only suitable for Auto Iris Cameras

**Compatible with many Swann cameras including:**

- 'CS' fixed body cameras: C480R (black & white), C500R (colour), C510R (colour with infra-red) or any 'CS' mount compatible cameras

## Auto Iris 3.5-8mm Lens

With manual zoom for consistent pictures in variable light

The Swann Auto Iris 3.5-8mm Lens is designed to fit 'CS' fixed body cameras such as the Swann C480R, C500R and C510R. The 3.5-8mm lens allows for manual zooming to vary the viewing angle and focus detail.

Use the lens for cameras exposed to natural light, near light fittings and more.

Swann Wide Angle, Fish Eye, Telephoto, Auto Iris 4mm, 8mm & Manual Vari-Focal 3.5-8mm lenses also available.
